

OGEMAW COUNTY ROAD COMMISSION
2002 - 2009 24 Hour Traffic Count Report

The traffic counts represented in this report are estimated counts for the 24 hour period beginning on the dates shown. The counts assume that all traffic consists of two axle vehicles which may or may not be the case. Roads which receive greater amounts of truck traffic should be adjusted to account for such a situation.

24 Hour Traffic Counts only represent those 24 hours and do not take into consideration other factors such as holiday traffic or special events. The Road Commission only takes traffic counts on weekdays. All areas in the county see higher amounts of traffic on weekends and holidays and these factors are taken into account when decisions are made to upgrade or maintain roads in Ogemaw County. Traffic is most consistent during the week, therefore, comparing traffic counts taken during the week is a more accurate presentation of the traffic patterns throughout the area.

All traffic counts represented are for informational purposes only and should only be used in conjunction with additional information when making decisions on the design or improvement of any roadway. The Road Commission shall not be held accountable for the accuracy or validity of the data in its present form and will not certify that the counts are true or certain.
